

RESULTS OF THE APRIL 2011 UTAH VOTER POLL
06 July 2011

Information about the Survey

Researchers at Brigham Young University's Center for the Study of Elections and Democracy invited members of the Utah Voter Poll panel, a group of voters who were recruited at polling places across Utah on Election Day in 2004, 2006, 2008, and 2010 to complete an online survey between March 31, 2011 and April 11, 2011. For more about the poll, see the methodology section below.

Methodology

Survey Field Dates: March 31, 2011 – April 11, 2011.

Sample Size and Margin of Error:

The survey was entered by 793 respondents and we have data on at least one question from 743 respondents and completed surveys from 646 respondents. The margin of error for a simple random sample with a sample size of 646 is about + or – 3.9 %. The Utah Voter Poll is drawn from the Utah Colleges Exit Poll, which has a more complicated sample design. A “design effect” multiplier would make the margin of error slightly higher than this.

Response Rate:

The response rate for the Utah Voter Poll was 13.4% (see calculations below). Potential respondents were sent four invitations to participate, spaced a few days apart over the survey field period. Our decision to send four invitations follows standard practices for internet surveys seeking to maximize response rates with minimal field time and disruption to potential respondents. Our 13.4% response rate is lower than our previous Utah Voter Poll surveys. We have no method to actually measure whether or not survey respondents actually received the email invitations. One explanation for the drop in response rates could be increased use of spam blocking software. Another explanation could be related to the length of time that some of the email addresses have been in the panel.

Response rate calculation:

Total email addresses after removes: 5,903

Total valid email addresses that received at least one email: 4807

Total accessed surveys: 793

Completed surveys: 646

Response rate = $646/4807 = 13.4\%$

Weighting:

There was no weighting done for the April 2011 Utah Voter Poll.
